

Starting by making

Invitation for dissemination

We believe the best way to learn is to *starting by making*. That goes for acquiring new skills but also for setting up a startup.

Maker Startups offered two education modules for students in the Interreg DE/DK region. The Maker module taught digital prototyping, innovation and introduces an array of maker technologies. The Developer module was about collaborating with SMEs and how to set up startup.

600+ students now know how to do digital prototypes and 10 new startups have said hello to the world.

Come join us and learn about the modules and the startups.

Venue and date

UCL University College
Seebladsgade 1, 5000 Odense C

17-01-2020: 10:30 – 13:00 (A light lunch will be served)
